Contents of Volume 10 1979

January

1 Building a science magazine within Prestel: I Berkovitch
4 A role for the physicist in the Third World: P F Logan
11 Teletext systems: a review: A J Biggs
20 The physics of petrol engine development: W J D Annand
26 The uranium ultracentrifuge: S Whitley

Book reviews 34 *Conference reports* 41
Forthcoming meetings 45 *Talking point* 46

March

49 The democratic control of science and technology: Rt. Hon. Tony Benn, MP
54 Automobile electronics: M H Westbrook
62 Is there a minimum size in integrated circuits?: J T Wallmark
68 Making measurements in hostile environments: B E Noltingk
74 Neutron radiography: status report: A I Lewcock
77 Devices for optical fibre communication systems: I Garrett

Conference reports 82 *Book reviews* 88
Talking point 93

May

97 Electron beam testing of integrated circuits: H Rehme
104 The Malvern Correlator: E R Pike
110 Prospects for the high-temperature reactor: M S T Price and L R Shepherd
118 The man–machine interface: R B Stammers
124 Aspheric optics: E Heynacher

Book reviews 132 *Conference reports* 137
Talking point 141

July

147 Japanese R and D: H A J Prentice
152 Chemical vapour deposition: M J Archer
162 Modern communication services: G Arndt, M Lang and H Unterberger
171 Visualisation of ultrasound in solids: V M Baborovsky

Editorial: Freedom for science and technology 145
Book reviews 178 *Conference reports* 184
Talking point 190

September

195 Breaking electric circuits: W Hertz
202 Explosion suppression in industry: P E Moore
208 Physics in agriculture: D J White
216 The future for MHD power generation: L H Th Rietjens

Leader article: Scientists in Whitehall 193
Book reviews 222 *Conference reports* 226
Talking point 230

November

236 Deep ocean mining for manganese nodules: J E Halkyard
244 Geothermal energy: technological aspects of exploitation: H C H Armstead
252 Progress in desalination: J C Schippers
259 Scanning Auger electron microscopy: R Browning and M Prutton
266 Environmental remote sensing part 1: D T Gjessing

Editorial: Buying and selling technology 233
Book reviews 272 *Conference reports* 274
Talking point 277

physics in technology

Index to Volume 10 1979

Subject index

Articles, reports on conferences (C), editorials and leader articles (E) are referenced cyclically by keywords of title

Acoustic emission and materials evaluation (*C*) 184
agriculture, Physics in 208
Analysis by particle beams (*C*) 229
Aspheric optics 124
Auger electron microscopy, Scanning 259
Automobile electronics 54

Breaking electric circuits 195

Charge-coupled devices (*C*) 227
Chemical vapour deposition 152
colour, Wonders of (*C*) 42
communication services, Modern 162
communications systems, Devices for optical fibre 77
contamination: its genesis, detection and control, Surface (*C*) 85
Correlator, The Malvern 104

democratic control of science and technology, The 49
desalination, Progress in 252
devices, Charge-coupled (*C*) 227
devices, Opto-electronic (*C*) 226

electric circuits, Breaking 195
Electron beam testing of integrated circuits 97
electron microscopy, Scanning Auger 259
electronics, Automobile 54
energy, International symposium on wave and tidal (*C*) 41
energy systems, 2nd international symposium on wind (*C*) 41
energy: technological aspects of exploitation, Geothermal 244

engine development, The physics of petrol 20
engineering surfaces, Int. conf. on the metrology and properties of (C) 187
enhancement, Image restoration and (C) 137
Explosion suppression in industry 202

fibres industry, Physics and technology in the (C) 139
films on semiconductors, Insulating (C) 274
Freedom for science and technology (E) 145

Geothermal energy: technological aspects of exploitation 244

High-speed photography (C) 45
high-temperature reactor, Prospects for the* 110
hostile environments, Making measurements in 68

Image restoration and enhancement (C) 137
incoherent light sources, 2nd international symposium on (C) 185
integrated circuits, Electron beam testing of 97
integrated circuits?, Is there a minimum size in 62

Japanese R and D 147

lasers and their applications, Semiconductor injection (C) 186
Light measurement in industry (C) 44
light sources, 2nd international symposium on incoherent (C) 185

machine interface, The man– 118
Malvern Correlator, The 104
man–machine interface, The 118
manganese nodules, Deep ocean mining for 236
marine environment, Materials in a (C) 86
materials, Application of rare earth (C) 83
materials evaluation, Acoustic emission and (C) 184
Materials in a marine environment (C) 86
materials, Newer optical (C) 138
measurements in hostile environments, Making 68
metrology and properties of engineering surfaces, Int. conf. on the (C) 187
MHD power, The future for 216
microscopy, Scanning Auger electron 259
mining for manganese nodules, Deep ocean 236

Neutron radiography: status report 74

optical fibre communication systems, Devices for 77
optical materials, Newer (C) 138
optics, Aspheric 124
Opto-electronic devices (C) 226

particle beams, Analysis by (C) 229
petrol engine development, The physics of 20
photography, High-speed (C) 45
Physics and technology in the fibres industry (C) 139
planning challenges, Meeting today's (C) 82
power, The future for MHD 216
Prestel, Building a science magazine within 1

radiography: status report, Neutron 74
R and D, Japanese 147
rare earth materials, Applications of (C) 83
reactor, Prospects for the high-temperature* 110
reliability physics symposium, 17th international (C) 188
remote sensing, Environmental 266
restoration and enhancement, Image (C) 137

Scanning Auger electron microscopy 259
science and technology, Freedom for (E) 145
science and technology, The democratic control of 49
science magazine within Prestel, Building a 1
Scientists in Whitehall (E) 193
Semiconductor injection lasers and their applications (C) 186
semiconductors, Insulating films on (C) 274
semiconductors, Preparation and assessment of (C) 84
Surface contamination: its genesis, detection and control (C) 85
surfaces, Int. conf. on the metrology and properties of engineering (C) 187

Technology, Buying and selling (E) 233
technology, Freedom for science and (E) 145
technology, The democratic control of science and 49
Teletext systems: a review 11
Third World, A role for the physicist in the 4
tidal energy, International symposium on wave and (C) 41

ultracentrifuge, The uranium 26
ultrasound in solids, Visualisation of 171
uranium ultracentrifuge, The 26

Visualisation of ultrasound in solids 171

wave and tidal energy, International symposium on (C) 41
Whitehall, Scientists in (E) 193
wind energy systems, 2nd international symposium on (C) 41

Conferences reported (by date)

10–13 September 1978	Surface contamination: its genesis, detection and control	85
12–13 September 1978	Light measurement in industry	44
27–29 September 1978	International symposium on wave and tidal energy	41
3–4 October 1978	Wonders of colour	42
3–6 October 1978	2nd international symposium on wind energy systems	41
4 October 1978	High-speed photography	45
17 November 1978	Applications of rare earth materials	83
28 November 1978	Meeting today's planning challenges	82
13 December 1978	Preparation and assessment of semiconductors	84
19 December 1978	Materials in a marine environment	86
19 December 1978	Image restoration and enhancement	137
15 March 1979	CCDs for signal processing	227
22 March 1979	Physics and technology in the fibres industry	139
28 March 1979	Newer optical materials	138
28–29 March 1979	Semiconductor injection lasers and their applications	186
3–5 April 1979	Acoustic emission and materials evaluation	184
9–12 April 1979	2nd international symposium on incoherent light sources	185
18–20 April 1979	Int. conf. on the metrology and properties of engineering surfaces	187
24–26 April 1979	17th international reliability physics symposium	188
16 May 1979	Industrial applications of particle beams for materials analysis	229
23 May 1979	Opto-electronic devices for measurement and communication	226
2–4 July 1979	Insulating films on semiconductors	274
